

Set 1 · Script & Numbers

क ख ग

How to print: double-sided, "**flip on long edge**," 100% scale (never "fit to page"), portrait. Cardstock if available. Print the alignment tester below first on one sheet, check that each FRONT lands exactly on its BACK, then print the decks.

How to cut: the dashed lines are shared cut lines — one straight cut per line (a ruler and craft knife, or a small paper trimmer). The tick marks at the page edges show where every cut meets the edge.

How to study: Devanagari side up first — always try to READ before flipping. Say the answer out loud, gender included. Box system and schedule: Book 0, "The Leitner system." The corner code (D05-012) keeps shuffled decks sortable.

In this set: TEST (8 alignment cards) · D01 Vowels & Matras (27) · D02 Consonants (40) · D03 Numbers 0–100 (101). Start D01 in Week 1, D02 in Week 2, D03 from Week 5.

Alignment Tester

A1

8 cards. Source: print me first. Print this deck double-sided, **flip on long edge**, at 100% scale (no “fit to page”). Cut along the dashed lines — the tick marks at the page edges line up with every cut. Card backs are mirrored so each back lands behind its front.

Front = Devanagari (read it aloud first!). Back = romanization, phonetics, meaning. The small code in the corner (e.g. TEST-001) keeps decks sorted if cards get mixed up.
